

Financial Controller

Full-time | Remote, USA based | Infinite Built

About the role

We are looking for a hands-on Financial Controller to own day-to-day finance across Infinite Built as it grows over the US, Canada, the UK and EU. You will manage the books, reporting and controls, working closely with leadership and external advisors.

What you will do

- Own day to day accounting, including accounts payable, accounts receivable and reconciliations.
- Manage month end close and produce timely, accurate financial statements.
- Build and maintain budgets, forecasts and cash flow reporting.
- Manage billing and revenue tracking across subscriptions and services.
- Coordinate with external accountants, tax advisors and auditors across jurisdictions.
- Put in place financial controls and processes that scale with the business.
- Provide reporting and analysis to support leadership decisions.

What we are looking for

- Qualified accountant (for example ACA, ACCA, CIMA, CPA) or equivalent experience.
- Strong background in financial control, reporting and close.
- Experience in a software, SaaS or services business is a strong benefit.
- Comfortable working across multiple currencies and jurisdictions.
- Confident with accounting systems and spreadsheets, and able to improve process as you go.
- Organised, accurate and comfortable owning finance in a small, fast moving team.

Why this role matters

Clean financials and clear reporting keep the business healthy as it grows, and give leadership the numbers to make good decisions.

What We Do

Infinite Built is the exclusive distributor of CxAlloy and Built Insights. Software used by commissioning, QA/QC, and project delivery teams across complex buildings, data centres, and mission critical infrastructure.

CxAlloy manages the day-to-day commissioning workflow: issues, checklists, tests, equipment records, and project documentation in one place. Built Insights extends that data into portfolio analytics, reporting, and smarter project visibility.

CxAlloy has been around long enough to have shaped how a lot of commissioning teams work. The platform supports teams across 35+ countries. Built Insights is the next layer. The team is small, we like working together, and the work moves quickly.

Why You Should Work With Us

We are a small, remote-first team across the US, Canada, the UK, Europe and Ireland. You will have real ownership and room to shape how we work. We want people who build alongside us, not in isolation.

Location

Remote, USA based.

How to apply

Apply through the link provided on each role or email sales@infinitebuilt with name, email and LinkedIn profile.
